

MOLD BLOCK STACK TURNER

Bottom mold block

actuation pedal
and locking

Dimensions (mm)			Weight (Kg)
Length	Width	Height	
880	800	1600	52

FOR WHAT USE ?

The stack turner is used to turn soft cheeses, blue cheeses or soft tommes.

It works with :

Bottomless block-molds, and double-sided plastic trays.

Reversible-bottom mold blocks.

It can also be used to drain stacked cheeses, saving draining tables and surface space.

FOR WHAT USE ?

The standard model operates with variable stacks of 4 to 10 mould blocks. An adjustable-position lower support, coupled with the upper clamping bar, centers the stack.

A tubular foot pedal operates the turning device from the front or side of the cart.

A serum collection plate at the bottom is removable for easy cleaning.

Custom dimensions available.

The mobile cart is designed to pass through an 84 cm wide door.
